

"Search for Extraterrestrial Life"

Prof. Joanna Molenda-Żakowicz

*University of Wrocław
Astronomical Institute*

Are we alone in the Universe?

That long-standing question may soon be answered thanks to the continuously improving, sophisticated scientific methods and the rapidly developing space exploration of the XXI century. In my talk, I will present the results of the current investigations and the research programs aiming at discovering extraterrestrial life in the Solar System and beyond. Sooner than expected, the extraterrestrial life may be not just only about believing!

ERASMUS+ series of seminars

4th Nov. 2019

10:00-12:00

Sezione Astrofisica
Osservatorio Astrofisico di Catania
Via S. Sofia n. 78
